Descriere

Aluminum armchair Raven pakoworld stackable white frame-natural textilene-rattan 57x62x78cm For those of you who are looking for an armchair for your garden, balcony or business area, the Raven series is the best proposal on the market. The ideal combination of quality and comfort turn it into a necessary accessory for every space. Specifications: * Aluminum and rattan construction of excellent quality that offer resistance to wear and tear. Rattan is a type of plant material derived from the stem of the Rattan plant, which belongs to the Palm family. The main property of rattan is its flexibility, as it can be woven and shaped easily. It is also durable and weather resistant, making it ideal for additional outdoor spaces. * Aluminum creates a protective oxidizing layer when in contact with air, protecting against corrosion, while being fully recyclable without losing its properties, making it a very sustainable material. * Seat made of textilene. Textilene is an extremely durable material widely used in outdoor furniture and fittings. It consists of polyester fibers coated with PVC (polyvinyl chloride), creating a material that combines durability, weather resistance and flexible texture. This material allows air to pass through, helping to maintain a cool feeling during use. * The ends of the legs have special protective covers. * Offered in natural-white color. Product dimensions: Length: 57 cm. Width: 62 cm Height: 78 cm Seat height: 44 cm Endurance weight: 120 kg Remarks: The product is delivered in its factory packaging. The color shade of the product may differ slightly from its photographic representation on your screen.
