Caracteristicile principale: Structura din otel solida si rezistenta 2 compartimente principale si 2 rafturi superioare Bara practica pentru umerase Agatatori pentru haine Inchidere cu cheie Suporturi pentru etichete si orificii de ventilatie in usi Culoare alba Dulap de vestiar alb KACPER II – organizare la nivel inalt Dulapul de vestiar KACPER II din metal este o piesa de mobilier care schimba interiorul la locul de munca, in atelier, in cabinetul medical sau in sala de sport. Marimile compacte ale dulapului merg mana in mana cu o serie de facilitati. In acest dulap alb incap usor articole de imbracaminte si incaltaminte, o geanta, un rucsac si lucrurile de valoare, precum telefon si portofel. Modelul de dulap KACPER II ajuta eficient la organizarea spatiului si restabilirea ordinii. Structura rezistenta Dulapul de haine KACPER II este fabricat din otel de calitate excelenta, cu grosimea de 0,6 mm, care se caracterizeaza printr-o rezistenta ridicata. Vopsirea otelului in camp electrostatic sporeste suplimentar rezistenta la deteriorari mecanice si deformari. Acest lucru garanteaza mentinerea aspectului excelent al acestui dulap de haine,

inclusiv dupa o perioada indelungata de utilizare intensa. Interior functional Atual dulapului din metal KACPER II il reprezinta interiorul variat. In dulapul de dimensiuni reduse este loc pentru doua compartimente principale, care pot fi impartite suplimentar, fapt datorita caruia hainele curate nu intra in contact cu cele murdare. In cele doua rafturi superioare incap usor o geanta, un rucsac sau alte obiecte, iar datorita agatatorilor suplimentare, lucrurile necesare sunt mereu la indemana si nu trebuie cautate mult timp. Spatiul inferior al dulapului este locul ideal pentru incaltaminte sau instrumente mai grele. Depozitare sigura Dulapul de vestiar KACPER II are montate pe ambele usi incuietori de incredere. Asadar totul se poate pastra sub cheie fara grija pierderii lucrurilor de valoare. Datorita celor doua incuietori independente una de cealalta, dulapul poate fi folosit nu doar de o singura persoana, ceea ce imbunatateste organizarea la locul de munca si permite economisirea de spatiu valoros. Circulatie neintrerupta a aerului Orificiile speciale de ventilatie din usile dulapului garanteaza circulatia constanta a aerului si elimina aparitia mirosurilor neplacute. Hainele atarnate in dulap raman proaspete, inclusiv dupa o zi intreaga in care au stat inchise. Datorita circulatiei aerului, in dulap poate fi pastrata, de asemenea, incaltamintea. De o mare utilitate sunt totodata suporturile pentru etichete de pe usi.
