Datorita marimilor compacte, acest dulap de imbracaminte este potrivit pentru spatii mici si permite economisirea de loc pretios. Dulapul de vestiar este o piesa de mobilier de neinlocuit la locul de munca, in atelier, in clinica, in sala de sport sau la bazin. Asigura depozitarea confortabila a imbracamintei, incaltamintei si obiectelor personale, iar totodata ajuta la organizarea spatiului. Structura solida si rezistenta Dulapul de vestiar KACPER II este fabricat din otel laminat la rece de cea mai inalta calitate, cu grosimea de 0,6 mm, vopsit electrostatic. Acest fapt implica rezistenta la deteriorari mecanice si deformari. Inclusiv utilizarea intensa in timp nu are un impact asupra aspectului acestui dulap de haine, care ramane in stare

perfecta. Interiorul diversificat al dulapului Modelul de dulap KACPER II este prevazut cu un interior bogat si inteligent organizat, in care incap toate lucrurile necesare. Cele doua compartimente principale pot fi impartite suplimentar, obtinand astfel spatii separate pentru hainele curate si cele murdare. Rafturile superioare sunt potrivite atat pentru lucruri mici, cat si pentru genti mai mari. Partea inferioara este un loc excelent pentru incaltaminte, iar agatatorile suplimentare ofera si mai multe posibilitati de organizare a spatiului in dulap. Inchidere cu cheie Dulapul de vestiar din metal este prevazut pe ambele usi cu incuietori solide, care permit mentinerea in siguranta a obiectelor personale si de valoare din dulap. Acest lucru asigura un control deplin asupra obiectelor depozitate, iar totodata elimina stresul cauzat de pierderea acestora. Datorita celor doua incuietori, de o astfel de protectie pot beneficia doua persoane independente una de cealalta. Ventilatie neintrerupta si suporturi pentru etichete Orificiile speciale de ventilatie din usile dulapului KACPER II permit circulatia constanta a aerului si elimina riscul de acumulare a mirosurilor neplacute in interiorul dulapului. Datorita acestui fapt, hainele atarnate nu prind un miros urat, chiar daca au stat o zi intreaga in dulap. Amplasarea orificiilor in partea inferioara a usilor permite pastrarea incaltamintei in acel loc. La randul lor, suporturile pentru etichete faciliteaza organizarea unui astfel de dulap SSM.
