Panou perforat independent – ordine la indemana Unelte imprastiate neglijent prin atelier sunt o pierdere de timp si productivitate. O placa perforata va schimba acest lucru, adunand toate accesoriile necesare intr-un singur loc vizibil. Un sistem simplu de organizare se traduce printr-o munca mai usoara si mai putina frustrare atunci cand cautati cheia sau surubelnita potrivita. Solutia functioneaza bine in garaje, ateliere casnice si ateliere profesionale. Caracteristicile principale ale panoului perforat pentru scule: Design independent Otel carbon durabil acoperit cu pulbere Unghi ergonomic al panoului – 15° Picioare de nivelare stabile – reglare de 10 mm Capacitate totala de incarcare 30 kg Perforatie completa si universala Potrivit pentru dulapuri, birouri si bancuri de lucru Jan Nowak Placa pentru scule – asezati-o unde doriti Panoul metalic nu necesita montare pe perete sau gaurire – se sprijina independent direct pe blatul de lucru, masa sau in interiorul dulapului Jan Nowak. Greutatea redusa a organizatorului permite mutarea acestuia in functie de sarcinile curente sau de

modificarile in amenajarea statiei de lucru. Datorita picioarelor reglabile, panoul este stabil chiar si pe suprafete inegale. Perforatie completa – confort maxim Gaurile distribuite pe intreaga suprafata a panoului va ofera libertate nelimitata de a agata scule si accesorii pentru panouri perforate. Carligele, suporturile si recipientele pot fi montate exact acolo unde sunt necesare, fara nicio restrictie. Sistemul va permite sa ajustati in permanenta dispunerea in functie de sarcinile de indeplinit. Acest lucru este deosebit de valoros intr-un atelier dinamic. Inclinare ergonomica pentru o vizibilitate mai buna Suprafata placii este inclinata la un unghi de 15° , ceea ce faciliteaza localizarea echipamentelor si accesul la unelte fara a va apleca. Usoara deviere de la verticala creste confortul atunci cand lucrati in picioare sau asezat. Ergonomia imbunatatita a statiei de lucru reduce efortul asupra spatelui in timpul sesiunilor lungi de bricolaj. Constructie durabila din otel a panoului pentru scule Panoul perforat pentru scule este fabricat din otel carbon cu grosimea de 0,6 mm, acoperit cu pulbere. Acest lucru face ca organizatorul de atelier sa fie rezistent la deteriorari mecanice, zgarieturi si coroziune. Capacitatea maxima de incarcare de 30 kg asigura ca panoul nu se va rasturna sub greutatea echipamentului si nu va zgaria suprafata blatului de lucru sau a dulapului.
