Are you looking for the ideal solution to enjoy your outdoor space without compromising on quality or style? This folding chair perfectly combines durability with comfort, making it an essential piece for any balcony, terrace, or garden. Technical Features: Sturdy steel frame with electrostatic powder coating, highly resistant to wear and stress. Seat and backrest covered with premium quality textilene fabric. Textilene is highly resistant to sunlight and humidity, while allowing the skin to breathe, ensuring seating comfort. High durability: suitable for outdoor use, even when exposed to weather conditions. Folding design: easily and quickly folds for convenient storage without taking up space, making it ideal for small areas. Available in champagne color. Product Dimensions: Length: 46 cm Width: 51 cm Height: 81 cm Seat Height: 45 cm Material Information: Metal: Widely used in furniture manufacturing, metal offers many advantages compared to other materials. It is extremely resistant to damage, making it ideal for furniture designed for daily use in demanding environments. It maintains its shape and structure flawlessly, ensuring stability and long lifespan. Additionally, metals can have special properties such as antimicrobial action (copper) or superconductivity (molybdenum). Textilene: A highly durable material widely used in outdoor furniture and accessories. It is made of polyester fibers coated with PVC (polyvinyl chloride), resulting in a material that combines strength, weather resistance, and flexibility. Its breathable structure allows air circulation, helping maintain a cool and comfortable seating experience. Care Instructions: Metal: For indoor metal furniture, regular dusting or wiping with a damp cloth is sufficient. For outdoor metal furniture: Apply a protective cream for longer-lasting protection (available in stores). Powder-coated furniture (electrostatic paint) is highly durable and easy to clean with a damp cloth. If not powder-coated, keep away from water and moisture; cover with protective covers and, if possible, store indoors during winter. If rust appears, remove it with turpentine, then apply anti-rust varnish before repainting with oxidation-resistant paint. Textilene: Easy to clean with mild soap and water. Requires no special maintenance and remains in good condition with minimal care. Notes: Product is delivered pre-assembled in factory packaging. The actual color shade of the product may slightly differ from its on-screen representation.
